

▣ SCOPE

This device allows to fish with electrodes or by trawling, in waters ranging from 500 to 50,000 $\mu\text{S} / \text{cm}$, thus allowing, all types of fishing from brackish water to seawater.

Its qualities for adaptation make it ideal for researchers and professionals who deal with many different species.

It allows electrode fishing for all fish and shrimp in fairly shallow waters (less than 2 m), and trawl fishing for flatfishes (sole, plaice, etc ...) beyond (above 2 m).

▣ MAIN STRENGTH

- Ergonomics of the device and its generating unit.

Cover and boxes in reinforced polyester with stainless steel frame fitted with wheels with wide tires for an easy handling

- Safety

Device controlled by non-conductive glove with magnet. Specific power supply connectors preventing connection to the mains or to a generator does not comply.

- Miscellaneous

Wired or wireless remote. With the possibility of control by anode carrier.

Puncture proof wheels.

Actual fished time counter in hours minutes and seconds, with reset.
